## SUMMARY

Full Stack Developer with 7+ years building scalable web applications using Java Spring Boot, React, and TypeScript. Proven experience modernizing legacy platforms, designing REST APIs, and developing responsive user interfaces. Strong background in GraphQL, Node/Express, Supabase, and automated testing (Playwright/Vitest). Adept at CI/CD, Vercel/Railway deployments, and collaborating with cross-functional teams to deliver high-quality solutions.

---

## WORK EXPERIENCE

### Frontend Developer

Make Digital / Nov 2022 - Present

- Developed production frontend features using React, TypeScript, and styled-components
- Integrated frontend applications with GraphQL APIs, implementing complex queries and mutations to support multi-step business workflows
- Worked with backend services to optimize data fetching, caching, and API usage
- Designed and maintained a reusable component library documented with Storybook, improving UI consistency and developer efficiency
- Implemented end-to-end tests with Playwright and unit tests with Vitest increasing confidence in releases and reducing regressions
- Collaborated closely with backend engineers, designers, and QA to deliver end-to-end features

### Software Engineer

tbb bank / May 2022 - Nov 2022

- Developed and maintained backend services using Java Spring Boot for core banking features such as transfers, top-ups, and bill payments
- Designed and consumed REST APIs supporting frontend and mobile applications
- Ensured API reliability, performance, and proper error handling for critical user flows
- Collaborated with frontend teams to align API contracts with UI requirements
- Wrote unit tests with Jest and assisted in debugging and resolving production issues

### Programmer Analyst

AIS / Oct 2018 – May 2022

- Led the replacement of legacy internal systems by developing new web applications
- Participated in system and database design, working with stakeholders to define data models and application workflows
- Developed full-stack applications using Angular for frontend and Spring Boot for backend services.
- Designed and implemented database structures to support scalable systems using PostgreSQL.
- Created and maintained REST APIs and scheduled batch jobs using Spring Batch.

- Built a specialized tool using Flask and image processing libraries to analyze histograms of image datasets.
  - Gained hands-on experience working with real-world business applications in a collaborative team environment.
- 

## EDUCATION

### Bachelor's Degree in Computer Engineering

- Suranaree University of Technology, 2014 - 2018
- 

## ADDITIONAL INFORMATION

- **Languages:** TypeScript, Java, NodeJS, JavaScript, Python, YAML
- **Backend:** Node.js (Express), Spring Boot
- **Frontend:** React, Angular, Next.js, Vite
- **API Technologies:** REST, GraphQL, Apollo, Firebase Admin SDK
- **UI & Frontend Tooling:** styled-components, tailwind css, Material UI, ant design, Storybook, Responsive Design
- **Databases:** PostgreSQL, Firestore, MongoDB, Supabase
- **Testing/Automation:** Playwright, Jest, Vitest, Spring Batch
- **Tools & DevOps:** Git, Gitlab, Sourcetree, Jenkins, Jira, ClickUp, Vercel, Railway
- **Soft Skills:** Strong analytical and troubleshooting abilities, team player, high adaptability and willingness to learn
